Executive Summary

This catalog showcases our software portfolio, purpose-built to address the unique challenges faced by modern enterprises. **Unlike vendors who prioritize SaaS solutions,** we champion on-premise deployment—and have the expertise to deliver it, because your data belongs in your hands.

Cloud-based models often sacrifice control, customization, and security in favor of convenience. Our approach ensures that your infrastructure remains yours: fully customizable, highly secure, and free from third-party dependencies.

Designed for flexibility and interoperability, our software integrates seamlessly into your existing systems, aligning with your specific objectives while safeguarding your data. With on-premise solutions, you gain the performance, scalability, and control that centralized cloud models simply cannot provide.

The future belongs to businesses that value autonomy and resilience. Explore how our solutions can enhance your operations and provide the long-term security you deserve. Please don't hesitate to contact us for more details or to arrange a demonstration.

A Note About Ransomware & SaaS

Ransomware is now the most pervasive threat to organizations worldwide, with attackers zeroing in on internet-connected services as their primary entry point. From vulnerable software platforms to misconfigured third-party applications, the attack surface has grown exponentially, often leaving enterprises blindsided.

Real-World Attacks via Internet Services (SaaS)

High-profile ransomware campaigns have proven how devastating breaches through connected services can be. These aren't hypothetical risks—they are happening now:

Third Party Service	Affected Organizations/Users	Estimated Cost
Change Healthcare Systems	U.S. healthcare providers	\$22 million ransom paid; potential total costs up to \$3.2 billion
Evolve Bank & Trust	Financial Institutions & Partners	Undisclosed; Inc. major data breach affecting banking operations
Colonial Pipeline (VPN)	Largest fuel pipeline in the U.S.	\$4.4 million ransom paid; significant operational losses
SolarWinds Orion	Government and private-sector organizations	Undisclosed costs; major national security implications
Blackbaud (Cloud Hosting)	Educational institutions, nonprofits	Millions in recovery costs and legal settlements

Forward to Our Solutions

Our software suite is built to solve real problems, making your operations more efficient and your workflows more manageable. Designed with integration and scalability in mind, our tools are tailored to meet the diverse needs of businesses, from routine administrative tasks to complex, multi-department processes.

We will work to provide a unified platform that drives productivity without unnecessary complexity. Each application is engineered to work with your systems and deliver measurable results, ensuring you stay in control of your operations.

Some of the key capabilities in our portfolio include:

- **Workforce Management:** Timekeeping, timesheets, scheduling, and integration into payroll systems.
- **Business Operations:** Contract generation, work orders, invoicing, purchase orders, and automatic mileage calculation.
- **Customer Experience:** Ticketing systems and advanced CRM tools to enhance client interactions.
- **Dynamic Environments:** Digital signage, video walls, and IP camera management solutions for visual and operational control.
- **Document Management:** OCR for document digitization, advanced search and retrieval capabilities, and templating systems to manage and automate repetitive documentation tasks.
- **Post-Dispatch Reporting:** Detailed reporting tools that capture and analyze operational data for forecasting & improved decision-making.

Built on a foundation of PostgreSQL, ColdFusion and Ajax, our enterprise-grade tools ensure stability, scalability, and seamless integration with your existing systems. As your needs evolve, our software is designed to adapt and grow with you.

Explore the following pages to see how our solutions can support your business goals and streamline the way you work.

#1001 | MCCSoft Timesheets

Track Employee Hours with advanced timesheets and timekeeping software:

The image displays the MCCSoft Timesheets interface. On the left, a mobile-style view shows the MCCSoft logo, a user selection dropdown (CORP twalchock), and buttons for 'Clock Out', 'Timesheet', and 'Time Off'. The 'Last Action' is 'Clock In at 2024-11-23 20:23:55' and the 'Duration' is '00:08:42'. On the right, a desktop view shows the 'Week of February 10 - February 16' for employee '[175] Tyler Walchock'. It lists clock-in and clock-out times for Monday, February 10th, resulting in 8.02 hours. A modal window titled 'Add Timesheet Entry' is open, showing a 'Punch Type' dropdown set to 'Clock Out', a 'Time' field set to '06:00 PM', and a 'Job' dropdown set to 'Office'. The background shows a weekly grid with 'No Entries' for other days and a 'Total Hours: 17.02' at the bottom right.

#1002 | MCCSoft Contracts

Generate and digitally sign work contracts on demand:

Contract Tool							GENERATE
Contract ID	For Customer	Contract Name	Service Level	Status	Signed On	Actions	
1009	ACME Corp	Managed IT Support - Gold	Gold	Draft		View	Request Signature
1008	ACME Corp	Managed IT Support - Silver	Silver	Draft		View	Request Signature
1007	ACME Corp	Managed IT Support - Silver	Silver	Draft		View	Request Signature

#1004 | MCCSoft Work Orders

Optimize operational efficiency with our comprehensive work order tracking and personnel management system. The platform delivers robust functionality through an intuitive interface, enabling seamless oversight of work orders, resource allocation, and team coordination. While the illustrated example demonstrates refuse bin rental tracking, the system's flexible architecture readily adapts to diverse operational requirements across multiple industries and use cases.

#1005 | MCCSoft Fleet Management

Automatically geo-track your fleet, with accurate mileage reporting, post dispatch reporting and estimate scheduled maintenance by tracking driving behavior

The screenshot displays the MCCSoft software interface for Fleet Management. On the left is a navigation sidebar with the MCCSoft logo and a menu including: 2:05:40 AM Official Time (CDT), Production, Accounting, Table Maintenance (highlighted), Customers, Departments, Employees, Invoice Items, Projects, Vehicles, Timekeeping, and DSR. The main content area is titled 'MCCSoft | Portal > Vehicles' and 'Vehicle Maintenance'. It features a search bar 'Find A Record:' and an 'ADD NEW' button. Below is a table with the following data:

Vehicle ID	Vehicle Name	Make	Model	Year	Note	Odometer	Plate #	VIN #	Active Flag
1005	Work Truck 1005	Ford	F150	2017		78000	496TPF	1G1A12B123456789	Y
1003	Work Truck 1003	Toyota	Tundra	2011		120143	OC469C	JA3AP57J5SY000719	Y
1002	Work Van	Ford	Transit Connect	2013		189000	179TH	JH4KA3151KC019450	Y
1001	Work Truck 1001	Chevy	S10	2002		120000	0240H	5NPDH4AE6BH023266	Y

At the bottom of the table area, it says 'Showing 1 to 4 of 4 entries' and includes 'Previous' and 'Next' navigation buttons with a page number '1' in between.

Other Features

Track employee records, their departments, and safely store and retrieve their W2's, resumes, performance reviews or notes.

The screenshot shows the 'Employee Maintenance' page in the MCCSoft portal. It features a search bar, a table of employee records, and a sidebar with navigation options.
